

Cloud Readiness Assessment for Equinix Metal™

Migrate to Bare Metal with Confidence

Assess your organization's readiness to move your specialized workloads to an Equinix bare metal solution. The *CloudPro Readiness Assessment for Equinix Metal™* is a consultative engagement designed to evaluate your workloads for migrating to bare metal.

Equinix enables you to deploy your digital infrastructure globally with the world's largest network of interconnected data centers. And with Equinix Metal, your hardware is now at your fingertips, providing your business with access to secure, agile, high-performance compute.

Developing Your Bare Metal Strategy

The implementation choices for deploying a bare metal solution on a global scale can be daunting. CloudPro's team of experts work closely with you to ensure your cloud strategy is aligned with your business objectives. We assess your IT environment and workloads to help your organization improve its efficiency, agility and performance.

Our cloud readiness assessment helps your organization identify the requirements for your specialized workloads and maximize the value of your bare metal solution.

Execute at Speed and Scale

- Align business and technology strategies to drive desired business outcomes
- Create stakeholder value by understanding how bare metal cloud decisions impact your bottom line
- Increase security and workload performance in a cost effective, scalable bare metal environment

Elevate IT as an enabling function by improving business agility and speed. Whether you are new to the cloud or are already using cloud capabilities today, our fact-based analysis provides you with the tools you need to move forward.

Drive Innovation

CloudPro's unbiased approach provides your organization with the insight necessary to inform your cloud decisions. We help you optimize your operational efficiency and provide expert guidance on cloud provider selection and workload migration.

Our assessments are tailored to meet your unique business requirements and provide you with the optimal cloud migration strategy to drive innovation across your organization.

Overview

- High-level solution architecture
- Business requirements summary
- Technical requirements summary
- Cloud migration recommendations
- Capability development recommendations
- Cloud deployment prioritization
- Estimated TCO and benefits analysis
- Operations and security recommendations

Bare Metal Cloud Readiness Assessment

Accelerate your Cloud Adoption

Our assessment uses both quantitative and qualitative methodologies to help you leverage emerging technologies and achieve strategic business outcomes.

Bare Metal Readiness Assessment Methodology

Strategy	Develop strategy and plan to accelerate your cloud adoption initiatives by focusing on the cloud readiness of your applications, data and infrastructure.
Discovery	Interview infrastructure, applications and operations teams to understand current technology landscape, workloads, assets, processes, and operating model.
Analysis	Analyze your specific workload requirements and applications to determine best migration strategy and fit for target cloud providers.
Execute	Assist your deployment team with migration execution using industry best practices to ensure a successful, cost effective migration outcome.
Optimize	Analyze the allocation of cloud resources that support your applications, infrastructure, and workloads to maximize performance and minimize cost due to over-provisioning.

For more information on bare metal readiness assessments as well as our full lifecycle program and project management support, contact us at +1 (650) 383-7255.

Key Benefits

- Experienced team of cloud experts to ensure a successful bare metal migration
- Future-proof your bare metal cloud investment
- Industry best practices and assessment methodologies
- Trusted partner for business and cloud technology challenges
- Deep industry knowledge and cloud expertise
- Simple engagement process and collaboration to drive project success

Delivered By CloudPro™

CloudPro is an industry leader in hybrid-cloud consulting, cybersecurity, go-to-market and Salesforce services. We offer a comprehensive portfolio of cloud services that help drive innovation and accelerate the profits of our customers and business partners. With leading Fortune 500 customers and partners around the globe, our company delivers scalable cloud solutions that meet the changing demands of our clients.
