

Product Features

PowerCore DPA-220 Features

- Automatic gain scaling for 4/8 Ω loads
- Over-the-Network (OTN) firmware updates for security/reliability patches
- PoE support with external DC supply support
- Integrated web server for set-up & configuration
- Auto-load sensing & gain scaling at start-up
- Advanced PoE power negotiation at startup
- Rich suite of protection features
- Beacon/Identifying strobe for easy identification
- Multi-color LED patterns for status reporting
- Plenum rated, with hanger wire strap

Advanced PowerCore DPA-220+ Features

All PowerCore DPA-220 features plus:

- Symmetrix intelligent module support
- Application programming interface (API) support
- Real-time monitoring & reporting of:
 - System Status
 - Output Voltage
 - Output Current
 - Load Impedance
 - Temperature
- Digital signal processing (DSP) of audio signals
- Integrated beep, tone, noise masking signal generators
